Staff Full-Stack Software Engineer with 8+ years of experience designing and delivering scalable, secure, enterprise-grade applications using **.NET 8+** and **Angular 18+**. I am expert in **DDD**, **Microservices**, and **Clean Architecture** with firsthand ownership of system design, **performance optimization**, and complex integrations. Operates at technical leadership level — **driving architectural decisions**, **mentoring engineers**, and elevating engineering standards. Proven record building cloud-ready, containerized systems with **Docker** and **Azure DevOps CI/CD**. Driving impact at Tech Lead level with a strong trajectory toward Solution Architecture roles.

PROFISSIONAL EXPERIENCE

Staff Full-Stack .NET Developer **Oct 2024 – Present**

THIQAH Business Services – *Cairo, Egypt*

*Promoted from **Senior Full-Stack .Net Developer** (*Jan 2022 – Oct 2024*)*

- Lead architecture and delivery of enterprise platforms using ABP Framework (.NET 8 & Angular 18)
- Mentor a team of engineers through code reviews and design sessions.
- Establish coding standards, performance benchmarks, and security practices.
- Improved API response time from ~800ms to <200ms through performance optimization and architecture enhancements
- Automate CI/CD pipelines and deployment workflows.

Senior Full-Stack .NET Developer Jan 2022 – Oct 2024

THIQAH Business Services – *Cairo, Egypt*

- Delivered full-stack enterprise solutions for government and private sector clients
- Built scalable APIs and backend services aligned with performance and security standards
- Developed high-quality Angular applications with focus on UX and performance
- Participated in architecture discussions and technical decision-making
- Contributed to performance optimization and technical debt reduction

Senior .NET Developer Apr 2021 – Jan 2022

The Enterprise Company – *Cairo, Egypt*

- Developed and supported enterprise platforms for regional clients.
- Built backend services with focus on scalability and resilience.
- Collaborated across full SDLC including design, development, and deployment.
- Improved code quality through reviews and best practices

Senior .NET Developer Sep 2019 – Apr 2021

Unicom Group – *Cairo, Egypt*

- Built government-scale systems serve 100,000+ users.
- Developed APIs and backend services using .NET.
- Supported high-availability systems with 99%+ uptime.
- Participated in full SDLC and cross-team collaboration.
- Supported zero-downtime deployments for mission-critical systems with 99%+ uptime.

Senior .NET Developer Dec 2017 – Sep 2019

Victory Link – *Cairo, Egypt*

- Contributed to telecom-grade applications managing high-volume SMS delivery across multiple providers.
- Built backend services and APIs to support scalable messaging systems.
- Implemented SMPP-based integrations for large-scale communication.
- Developed a unified layer (SACU) to standardize interaction with multiple SMS providers.

PROJECTS

NCFB – THIQAH Business Services

- Led enterprise solution for National Center for Family Business; implemented workflow automation, SADAD payment integration, and multi-environment CI/CD with Vault secret management.

Skills: C# – ABP – .Net 8 – Rest API – DDD – LINQ – EF Core – MSSQL – Angular 17 – HTML5 – SCSS – Bootstrap – TypeScript – Hangfire –HealthCheck – Apigee – Notification & SADAD Payment integration – xUnit – NSubstitute – AutoFixture – Azure Artifacts (NuGets) – Azure Pipeline CI/CD – Docker – K8s – ArgoCD – Vault

CityLink Product – Freelance

- Owned full SDLC of smart-city platform; designed scalable microservices architecture and led end-to-end delivery.

Skills: C# – .Net 8 – Rest API – DDD – CQRS – LINQ – EF Core – MSSQL – MongoDB – Redis Cache – Angular 19 – HTML5 – SCSS – Tailwind – TypeScript – Hangfire – HealthCheck – Ocelot Gateway – Notification (Email & SMS), Fawry-Pay, POS, and Alex Bank Payment integration – Azure Pipeline CI/CD – Docker Compose

Enterprise.press – The Enterprise Company

- Built subscription-based news platform; integrated payments, Mailchimp, Azure IAM, and Google Docs; deployed via containerized CI/CD pipelines on AWS.

Skills: C# – .Net 6 – Rest API – DDD – LINQ – EF Core – Dapper – MSSQL – Angular 13 – HTML5 – CSS – Bootstrap – TypeScript – Hangfire –HealthCheck – Ocelot Gateway – Mailchimp, Azure IAM, and Google Docs integration – xUnit – Azure Artifacts (NuGets) – Azure Pipeline CI/CD – Docker compose – AWS ECR

 # More projects available upon request

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript
Architecture: DDD, Clean Architecture, Modular Monolith, Microservices, CQRS, Event-Driven Architecture.
Backend: .Net 8+ - ASP.NET Core – REST APIs – gRPC – GraphQL – Ocelot – Worker Services – Hangfire - SignalR
Frontend: Angular 18+ - TypeScript – HTML5 – SCSS – Bootstrap - Tailwind
Database: SQL Server – MongoDB – EF Core – Dapper – ADO.NET
Messaging: RabbitMQ - MassTransit
DevOps & Cloud: Docker – ArgoCD – Azure DevOps (Pipeline – Repos – Artifacts) – Linux – Vault (Secrets)
Observability: OpenTelemetry – SonarQube - JMeter
Testing: xUnit – NSubstitute – Moq – AutoFixture - TDD
AI & Productivity: GitHub Copilot – Prompt Engineering – AI-Assisted

EDUCATION & CERTIFICATES

Bachelor of Science (BSc) — Software Engineering – Arab Academy for Science & Technology and Maritime Transport, Cairo (2013 – 2017)

Certifications: .NET 8 Backend Bootcamp: Modulith, VSA, DDD, CQRS and Outbox (April 2026) **–** Complete 2025 Python Bootcamp – AI & Automation Focus (Dec 2025)

Languages: Arabic (*Native*) · English (*Professional Proficiency*)
